

PRD04676

Our « Anti Creep device to slide on a panel » family has been designed to reinforce clearance holes in plastics to provide a metal to metal contact allowing the application of clamping forces and limit the compression to avoid over-stressing of the plastic .

In addition to allowing a durable and safe assembly, our « anti-creep rings to assemble » solutions have advantageous characteristics such as the ability to be used on different panel thicknesses, on different hole diameters, etc.

Price: 0.00€
