Categories: Our Products, T-Proof Nuts, Tailormade Parts

Product Short Description :

_____

Our “T-PROOF®” family is designed to fasten and assemble sensitive applications preventing their accidental disassembly.

The conical geometry of this product and the use of odd number of slopes makes its loosening nearly impossible with pliers or any other object.

The family’s range is available in several formats (M6, M8, M10, M12).

For more information about the tightening tool, please contact us.

_____
